STOP THE REPUBLICAN SHUTDOWN

STATE-BY-STATE HEALTH CARE IMPACTS

After months of making life harder and more expensive for everyday Americans, Donald Trump and Republicans have now shut down the federal government because they do not want to protect the health care of the American people.

Right now, Americans are getting notices that their health care premiums are about to skyrocket by a whopping 114 percent because Congress has not extended health care tax credits. Republicans acted quickly to extend tax cuts for their billionaire buddies, but when it comes to Americans' health care, they would rather shut down the entire federal government than help Americans get the care they need.

Each day Republicans wait, costs will go up, thousands of Americans will go without care, and people will die. Because of Republicans' failure, millions of Americans will see even higher co-pays, premiums, and deductibles, and may lose their health care altogether. Across the country, **15 million Americans are at risk of losing their health care entirely** due to Republicans cutting Medicaid and gutting the Affordable Care Act. Republicans' refusal to extend tax credits will mean **22 million Americans will see their premiums increase by an average of 114 percent.**

- A typical family of four making $125,000 would see their health care costs **increase by $7,700** on average.
- A 60-year-old couple making $80,000 would see their health care costs **increase by a whopping $17,500** on average.
- A family of four making $64,000 would see their health care costs **increase by $2,600** on average.

Here's what Republicans' refusal to help American families secure health care would mean for all 50 states and the District of Columbia:
